PROJECTS

Portfolio - React, TypeScript, Tailwind CSS, Motion | Live | Code

- Personal portfolio showcasing my projects, tech stack, and developer profile.
- Designed in Figma and built a responsive React/TS portfolio with Motion animations and a contact form

Gym Tracker - React, TypeScript, Supabase | Live | Code

- A workout tracking application for planning workouts and monitoring progress.
- Implemented the complete workflow from creating workout plans to logging results.
- Separated database operations from UI components using a typed API layer built on Supabase.
- Implemented statistics, charts, filtering, sorting, and pagination for workout history.

Hospůdka pod Boušovem - React, TypeScript, Tailwind CSS, Motion, Sanity CMS| Live | Code

- Designed a responsive website in Figma and React based on client feedback.
- Integrated Sanity CMS and wrote GROQ queries to dynamically fetch and sort menu items.
- Implemented SEO best practices to improve search engine visibility.

Finance Tracker - JavaScript, Node.js, Express, MongoDB, Chart.js | Live | Code

- A full-stack finance tracking application featuring authentication, filtering, charts, and currency conversion.
- Designed a REST API using MongoDB and Mongoose, with separate CRUD operations and input validation.
- Implemented JWT authentication with access and refresh tokens stored in HttpOnly cookies.
- Tested key frontend workflows using Vitest and Testing Library.
